Aspiring Frontend Developer | AI Enthusiast

Technology enthusiast having a keen interest in frontend development, AI implementation, and API integration. Proficient in JavaScript and looking to create interactive and user-centric web experiences. Learning to create AI-driven tools and 3D visualizations with the help of emerging web technologies. Looking to learn on a continuous basis and discovering new-age solutions in technology.

EDUCATION

Bachelor of Technology - BTech in Computer Science

ABV-Indian Institute of Information Technology and Management •
GPA: 8.12

Gwalior •
08/2023 - 04/2027

Senior Secondary School

Khyati World School • GPA: 9.1

Ahmedabad • 04/2023

PROJECTS

Countdown Clock

Built a web app to log daily activities, calculate free time, and display a real-time countdown to a target date. Includes a visual circular timer and tracks total uncommitted time remaining until the goal.

GitHub: https://github.com/Maximus-08/Reminder_clock

React Mini projects

React projects using functionality like React router, Integration of TailwindCSS, ContextAPI (learning from Chai with Code)
